Part 3 - Detailed Discussion:

Q. Is friendship important in your culture?

A. Yes, friendship definitely does stand out at a pedestal which is above, I would like to say, above than the pedestal where relationship stands at. However, here I would also like to mention that with the term relationship, I would like to exclude the relationship of one with his or her spouse. In our culture we revere our friendship. We often recite that life is impossible without friends. Friendship is very special in our country, tradition and society.

Q. How many close friends can you have?

A. There is definitely a limit to all the good things that one can have access to. Similarly, though one can have 'n' number of friends but there are a very few who can be categorized as close friend, those whom one can confide in and have a heart to heart talk. In my case I can have 2-3 very close friends.

Q. Are friends more important than family?

A. No, I would not support this statement. There is no doubt that in case of need, it is the friends who will be beside you, but then we cannot compare family. Once again I would like to say that family in this instance comprises of the spouse, the parents and children, and their relationship is beyond comparison. Yes friends do definitely have a special edge in our life but family comes first. Perhaps then stands the friendship which is very important as well.

Q. What are the qualities of a good friend?

A. A good friend is a person in whom one can confide, can share one's heart out. Rather share anything and

everything without even thinking about the after effects of it. A good friend is also one who gives you a frank, fair and genuine advice, guidance and support in the hour of your need.
